

## 10.4 Practice Solutions

Directions: Find the volume of each figure. Round to the nearest tenth if necessary.

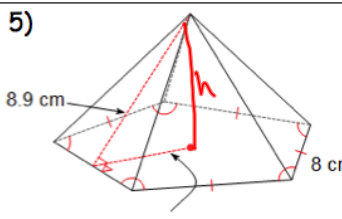

1)   $V = \frac{1}{3}(\frac{1}{2}ap)h$   
 $= \frac{1}{3}(\frac{1}{2})(4.1)(36)(11)$   
 $= 225.5 \text{ mi}^3$

2)   $V = \frac{1}{3}(s^2)h$   
 $= \frac{1}{3}(9^2)(6)$   
 $= 162 \text{ yd}^3$

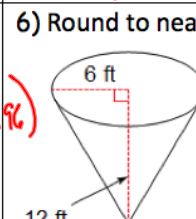

3)   $V = \frac{1}{3}(\frac{1}{2}bh)h$   
 $= \frac{1}{3}(\frac{1}{2})(4)(3)(9)$   
 $= 18 \text{ ft}^3$

4)   $V = \frac{1}{3}(s^2)(h)$   
 $= \frac{1}{3}(11)^2(4\sqrt{5})$   
 $\frac{484\sqrt{5} \cdot 3}{3} \text{ in}^3$   
 or  
 $360.819^3$

*Handwritten work for height:*  
 $h^2 + 5.5^2 = 10.5^2$   
 $h^2 = 10.5^2 - 5.5^2$   
 $\sqrt{h^2} = \sqrt{80} = \sqrt{16 \cdot 5}$   
 $h = 4\sqrt{5}$

5)   $V = \frac{1}{3}(\frac{1}{2}ap)(h)$   
 $= \frac{1}{3}(\frac{1}{2})(5.5)(4)(\sqrt{48.96})$   
 $= 256.4 \text{ cm}^3$

*Handwritten work for height:*  
 $h^2 + 5.5^2 = 8^2$   
 $h^2 = 8^2 - 5.5^2$   
 $h^2 = 48.96$   
 $h = \sqrt{48.96}$

6) Round to nearest tenth and leave in terms of  $\pi$ .   $V = \frac{1}{3}\pi r^2 h$   
 $= \frac{1}{3}\pi(6^2)(12)$   
 $= 144\pi \text{ ft}^3$   
 or  
 $452.4 \text{ ft}^3$

7) Round to nearest tenth and leave in terms of  $\pi$ .

$$h^2 + 3^2 = 9.5^2$$

$$h^2 = 9.5^2 - 3^2$$

$$h^2 = 81.25$$

$$h = \sqrt{81.25}$$

$$V = \frac{1}{3}\pi r^2 h$$

$$\frac{1}{3}\pi (3)^2 (\sqrt{81.25})$$

$$27.01\pi \text{ yd}^3$$

or

$$85.0 \text{ yd}^3$$

8) Round to nearest tenth and leave in terms of  $\pi$ .

$$V = \frac{1}{3}\pi (a^2)(18)$$

$$486\pi \text{ in}^3$$

or

$$1526.8 \text{ in}^3$$

Directions: Find the missing length.

9) The volume of a cone is  $21\pi$  and has a height of 7. What is the radius of the cone?

$$V = \frac{1}{3}\pi r^2 h$$

$$21\pi = \frac{1}{3}\pi r^2 \cdot 7$$

$$\left(\frac{3}{7}\right) 21\pi = \frac{7}{3}\pi r^2 \left(\frac{3}{7\pi}\right)$$

$$9 = r^2$$

$$3 = r$$

10) The volume of a square pyramid is 2048 and has a height of 24. What is the length of one side of the base?

$$V = \frac{1}{3}(s^2) \cdot h$$

$$2048 = \frac{1}{3}s^2 \cdot 24$$

$$2048 = 8s^2$$

$$256 = s^2$$

$$16 = s$$
